WFM02/01

You must have:

Mathematical Formulae and Statistical Tables (Blue)

Total Marks

Candidates may use any calculator allowed by the regulations of the Joint Council for Qualifications. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.

Instructions

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B). Coloured pencils and highlighter pens must not be used.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions and ensure that your answers to parts of questions are clearly labelled.
- Answer the questions in the spaces provided
– *there may be more space than you need.*
- You should show sufficient working to make your methods clear. Answers without working may not gain full credit.
- When a calculator is used, the answer should be given to an appropriate degree of accuracy.

Information

- The total mark for this paper is 75.
- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.

PEARSON

1. Using algebra, find the set of values of x for which

$$\frac{x}{x+2} < \frac{2}{x+5}$$

(7)

(1)

$$\sum_{r=1}^n \frac{2}{(r+6)(r+8)} = \frac{n(an+b)}{56(n+7)(n+8)}$$

(4)

Leave
blank

Question 2 continued

Lined area for writing the answer to Question 2.

- $$\frac{dy}{dx} + 2xy = xe^{-x^2}y^3 \quad (\text{I})$$

$$\frac{dz}{dx} - 4xz = -2xe^{-x^2} \quad (\text{II})$$

- (5)

- (1)

Leave
blank

Question 3 continued

- $$w = \frac{z-1}{z+1}, \quad z \neq -1$$

(a) Show that C is a circle and find its centre and radius.

(7)

(b) Sketch circle C on an Argand diagram and shade and label region R .

(2)

Leave
blank

Question 4 continued

(a) show that

$$\frac{d^2y}{dx^2} = 2 \cot x + 2 \cot^3 x \quad (3)$$

(b) Hence show that

$$\frac{d^3y}{dx^3} = p \cot^4 x + q \cot^2 x + r$$

where p , q and r are integers to be found. (3)

(c) Find the Taylor series expansion of $\cot x$ in ascending powers of $\left(x - \frac{\pi}{3}\right)$ up to and including the term in $\left(x - \frac{\pi}{3}\right)^3$. (3)

Leave
blank

Question 5 continued

- $$\frac{d^2y}{dx^2} - 2\frac{dy}{dx} - 3y = 2\sin x \quad (\text{I})$$

(b) find the particular solution of differential equation (I). (5)

Leave
blank

Question 6 continued

Figure 1 shows the two curves given by the polar equations

$$r = 1 + \cos \theta, \quad 0 \leq \theta \leq \pi$$

- The region R , bounded by the two curves, is shown shaded in Figure 1.

Leave
blank

Question 7 continued

$$\left(z + \frac{1}{z}\right)^3 \left(z - \frac{1}{z}\right)^3 = z^6 - \frac{1}{z^6} - k \left(z^2 - \frac{1}{z^2}\right)$$

(3)

(i) $z^n + \frac{1}{z^n} = 2 \cos n\theta$

$$(ii) \quad z^n - \frac{1}{z^n} = 2i \sin n\theta$$

(3)

$$\cos^3 \theta \sin^3 \theta = \frac{1}{32} (3 \sin 2\theta - \sin 6\theta)$$

(4)

$$\int_0^{\frac{\pi}{8}} \cos^3 \theta \sin^3 \theta \, d\theta$$

(4)

Leave
blank

Question 8 continued

Lined area for writing the answer to Question 8.
